

PCam

PCam

PCam® DSEdm

- The number 1 CAM system for the Die-Sinking erosion
- Programming of hundreds of electrodes in a few minutes
- Simulation anti-collision on PC
- Zero time programming, presetting and simulation on PC
- All PP for Die Sink machines.

PCam® Tool

- 30'000 Nw with +/- 3 micron of repeatability.
- Until 1000 Kg with 500x500x500
- Milling, Turning, Wire EDM and Die Sinking, Shearing

PCam® Pps

- The number 1 PPS system for the management of the workshop.
- Total integration of the planning and working process.
- Errors and loose of time reduced to zero
- Order status tracking, resources monitoring and efficiency.
- Automatic assignment of the tasks.

PCam® Robot/Cell

- Dynamic configuration of the cell and of the store.
- Load of pallets, electrodes and tools with active recognition.
- Priority management and measure machines.
- Realistic simulation of the machining within the cell.
- Remote management of the cell and of the machines (SMS, E-mail).
- Report of the cell work.

PCam® WEdm

- The number 1 CAM system for the Wire EDM erosion.
- Complete CAD functionality.
- Surfaces with automatic recognition of the conicity.
- All models for erosion.
- Programs are independent from the postprocessor.
- All PP for Wire EDM machines.
